## 2.1 Comparing Animals, Plants, and Decomposers

Use the Venn diagram below to show your ideas about what characteristics different organisms share. (For example, characteristics that all organisms share would go in the center, while characteristics that only plants have would go in the outside part of the Plants circle.)

<p><b>Try putting the numbers of these characteristics on the diagram</b></p> <ol style="list-style-type: none"><li>1. They grow</li><li>2. They need light</li><li>3. They move</li><li>4. They need and use energy</li><li>5. They move and change matter</li><li>6. They are made of cells</li><li>7. They need to consume food</li></ol>	<p><b>Think of your own characteristics, list them below, and put their letters on the diagram</b></p> <p>A.</p> <p>B.</p> <p>C.</p>
